Add up to three LP Storage Bins for \$200 each.

Dimensions: 48" W x 17 1/2" D x 32 3/4" H. Also available in 24 1/2" H Media Console.

The NEW Stereo Console is crafted from solid wood in the Hudson Valley with a variety of finish options for the cabinet and speaker front. The steel base with included LP storage bin comes in a durable powder-coated finish that coordinates with the cabinet. The console's surface is scaled to accommodate most turntables and comes in two heights; 33" console table and 24" media console.

The console is compatible with virtually any audio input source including turntable, iPod, and TV. A hidden compartment allows the user to hide a wireless base station like Sonos™ Connect, a phono preamp, or other small components that are popular with today's consumer. The console's hidden compartment also provides a wire management solution, allowing it to be placed anywhere in the home with only a single power cord visible. The Stereo Console comes with a pair of 4" full range drivers and a down-firing subwoofer set into a sealed, dampened, and ported cabinet.

Design by Blake Tovin and Matt Richmond.
